

LENSMETER
OPHTHALMIC OPTICAL INSTRUMENTS

MODEL **LM-10.10DX**

Aiming at a new stage in quality.

New Lensmeters, Simple, Light, Accurate, as well as Economical.

OUTSTANDING FEATURES;

1. A wide viewfield and a high eyepoint eyepiece enable easy examination.
2. The improved internal reading system assures easy measurement.
3. The green filter complying with the ISO standards enables high precision measurement.
4. LM-10: The corona shaped target enables easy measurement.
5. LM-10DX: The cross-line pinhole type target enables accurate measurement.
6. It is light and can be set anywhere with ease.
7. LM-10DX is standard with prism compensator.

SPECIFICATIONS;

Vertex power:

Range +25 to -25D
 Step 0.125D up to ±3D
 0.25D beyond ±3D

Prismatic power:

Range 5Δ(in a viewfield)
 20Δ(with a compensator)
 Step 1Δ

Cylindrical axis:

Range 0°-180°
 Step 1°

Measurable lens diameter:

Range 30-90mm
 Step 2mm

Target: Corona type (LM-10)

Cross-line pinhole type (LM-10DX)

Eyepiece focusing: +6D-6D

Tilting angle: 30°-90°

Power source: AC100~240V, 20W

Dimension: 380(H)×403(L)×180(W)mm

Weight: 4.9kg

Options: Prism compensator
